PORT WASHINGTON, WIS. – JANUARY 16, 2009 ... Franklin Energy Services, LLC, a leader in the implementation of energy efficiency programs on behalf of utilities, states, and municipalities, today announced the opening of an office in Appleton, Wis., the firm's sixth Wisconsin location supporting its Port Washington headquarters. Franklin has additional offices in Michigan, Minnesota and Nevada to serve its utility, municipality and government agency clients.

Since 1994, Franklin Energy staff has been working with utility end-use customers, providing technical assistance and access to utility incentives for energy efficiency improvement projects. The industry has been experiencing an upward trend and Franklin Energy has doubled its workforce twice in the past two years. Spurring the growth is a combination of an increasing desire for consumers to use less energy and the utilities' needs to reduce demand on their power plants. The Governor's Task Force on Global Warming is expected to influence energy efficiency activity as well.

The new Appleton facility will serve Wisconsin customers participating in either the Focus on Energy or Energy Incentives from We Energies programs. Staff members provide information, resources and financial incentives to help implement projects that otherwise would not be completed, or to complete projects sooner than scheduled for these programs.
