

# Consulting: Benchmarking & Building Energy Performance Standard Compliance

Franklin Energy's Benchmarking & Building Energy Performance Standard (BEPS) compliance consulting solution helps building owners meet regulatory requirements with end-to-end support—from benchmarking submissions and audits to compliance roadmapping and funding guidance.

# Consulting: Benchmarking & BEPS

Franklin Energy's Benchmarking & Building Energy Performance Standard (BEPS) compliance consulting solution helps building owners meet regulatory requirements with end-to-end support—from benchmarking submissions and audits to compliance roadmapping and funding guidance.

Our benchmarking & BEPS compliance consulting services give building owners confidence in navigating a fast-changing regulatory landscape. We simplify complex requirements by managing benchmarking, disclosure, and reporting while also conducting energy audits, retrocommissioning (RCx), and compliance planning.

## ▶ **ENERGY STAR® Portfolio Management**

We support every step of the benchmarking process, including data uploads, exemption analysis, and documentation for ENERGY STAR® Portfolio Manager. Our team ensures accurate submissions and full compliance with jurisdictional requirements across all major U.S. cities and states.

## ▶ **RCx + Energy Audits**

We conduct ASHRAE-compliant audits and RCx services to evaluate building performance, identify operational and capital improvements, and create cost-effective compliance pathways.

## ▶ **Measurement, Verification, and Reporting**

We provide meter- and monitoring-based M&V that validates savings, tracks performance, and supports ongoing compliance. Using NGAGE and OpenEE-compliant tools, we deliver transparent reporting and actionable insights—helping clients maintain compliance and plan future improvements with confidence.

## **KEY BENEFITS**

### **Streamlined Compliance**

Simplify compliance by managing the entire benchmarking and reporting lifecycle, from data uploads to disclosure.

### **Tailored Performance Roadmaps**

Unlock cost-effective efficiency strategies with ASHRAE-compliant audits and RCx services aligned to BEPS thresholds.

### **Funding-Ready Insights**

Maximize project value by connecting compliance measures to rebates, tax credits, and financing options.

## **WORKS WELL WITH**

### **Virtual Commissioning**

Enhance compliance pathways with remote diagnostics and RCx support for added savings.

### **Consulting: Transportation Electrification Roadmaps**

Align BEPS compliance with long-term electrification and carbon reduction goals.

### **Trade Ally Supply**

Accelerate implementation with bundled direct-install products and equipment upgrades.
